RAVENOL FORKOIL Ultra Light 2,5W is a full synthetic fork oil on ester base which was developed for all forks and shock absorbers of high performance motorbikes and especially for SHOWA and USD forks.

The synthetic components and the excellent viscosity index of **RAVENOL FORKOIL Ultra Light 2,5W** offer an optimum damping behaviour at all temperatures as well as excellent air separation behaviour under all operating conditions – even during racings.

Application Note

RAVENOL FORKOIL Ultra Light 2,5W was developed for the use in all chassis components of two-wheeler vehicles and offers excellent power characteristics. In order to obtain the optimum viscosity for the vehicle and operating condition the full synthetic fork oils are miscible among each other.

Characteristics

- good damping characteristics at all temperatures
- a high and stable viscosity index
- an excellent protection against corrosion, therefore a longer endurance of the fork components and shock absorbers
- as far as possible protection against corrosion of the inside components
- a very good air and water separation behaviour to prevent foam formation
- neutral behaviour against sealing made of plastics
- a very low pour point
